

SALTED LANDS COUNCIL

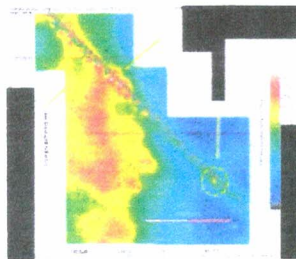

CONTACT: Fintan L. Dooley, Coordinator – findooley@gmail.com – 414-731-0520

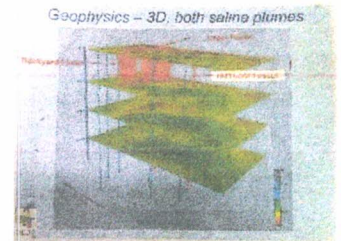

"The Rock Pile" disclosing deadlands still able to be revived. On the left 1st Well Plugged with CARES Act money relieving Chevron of the cost. Upper and right images in red show likely expenditures when Federal money is available. The zone in black is poisoned by failed berm.

Murphy 1968 Evaporation Pond

Fisher 2021 Electroconductivity Testing

Oklahoma Assoc. of Counties

An honest cleanup of the Rock Pile would require more than \$30 Million. Too much? That's an honest estimate based upon work I have done with our experts. Bottineau County honestly cleaned up could likely require a billion. We can locate, define lateral and vertical limits of plumes. Fintan will go to the farm, look at the land and help farmers begin the process of defining the problem, which, if left unresolved will continue to spread like cancer. Our experts do care. Fintan will connect farmers and their agronomists and bankers so that landowners will have the clout to negotiate a responsible cleanup.
